

ENCLOSURE

The enclosures are available in different sizes to accommodate multiple modules for any application. The modular designed technique is for easy-to install and become very flexible to the customers.

The enclosures are offered in 14, 18, 28 and 42 inches providing wide selections for small to large size areas. Rear/Top knockouts with plastic grommets that protect cable jackets and also allow enclosures for flush or surface mount applications. The enclosure are also available in hinged version with removable door and locks for more secure installation.

Patented smart "slide 'n' fit" installation design for brackets and enclosure provide the easiest way while installation and hence save considerable labor cost.
